

CASE STUDY

SUBWAY

Coolnomix® Report,

tutumenergy.es

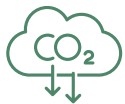

TUTUMENERGY

Annual Savings for Subway from this pilot:

kWh

4,124kWh representing a reduction of 29% per year in energy consumption

CO2

1,175 kg or 1.175 tonnes

Financial Savings

of £577

Coolnomix®

Reduce the energy consumption of your air conditioning and refrigeration without affecting the output you need. Our technology is maintenance free and can be easily installed by our qualified engineers with no disruption to your operation.

We keep your people, equipment and produce cool, and your energy budget from overheating.

About **SUBWAY**

The Subway portfolio consisted of several franchises that offers both drive through, seated restaurants and retail shops.

OVERVIEW

Leading Subway Franchise Invest in Coolnomix® technology to improve sustainability & reduce energy consumption.

TRIAL

- To reduce kWh consumption and improve their sustainability, Coolnomix® was installed and connected to ceiling mounted down flow 5.3kW & 6.1Kw AC units located in the food preparation and the serving and eat areas.

RESULTS

Subway, England

DAILY

- Coolnomix® active (ON) reduced daily energy consumption on average by 29% reducing the kWh consumption across the pilot AC unit.
- This saving is based on average daily consumption of electricity with Coolnomix® ON and Coolnomix® OFF over the 28 days of the trial.

Energy Reduction & Savings Forecast

Year 1

kWh = 4124 kWh per year
CO2 savings = 1,175 kg or 1.175 tonnes
Financial savings = £577
Cost = £0.14
Reduction in electricity consumption = 29%

**COOLNOMIX® WILL REDUCE ELECTRICITY CONSUMPTION
OF 29%.**

WE'RE AHEAD OF THE GAME

We deliver a powerful suite of solutions that reduce your carbon emissions, save you money with lower energy bills and generate revenue from being a more flexible energy user with the help of today's leading technology.
